1 Introduction Assembling

1.1 General information

This equipment should be installed, inspected, maintained and operated in accordance with EN1176-7 guidelines.

Before installation work commences, please check that you have all of the equipment and fixation components in the parts list provided (see Tables 3-1 and 3-2).

Any spare parts that may be required can be obtained directly from your supplier.

Following installation, complete assembly instructions, maintenance instructions and a maintenance record must be sent to the operator who must confirm receipt in writing. See the last page of this document.

All nuts and bolts are hot-dip galvanised or stainless steel.

One of the characteristics of stainless steel is that uncontrolled cold welding may occur when the nuts are tightened. To prevent this, it is necessary to spray the nuts and bolts with Teflon spray or another similar lubricant.

We hereby confirm that this play equipment has been tested and certified in accordance with the play equipment standard EN 1176-1.

Drawings / Views

All optical drawings are showing only the measurements/dimensions and are no mandatory technical views of the complete item.

We reserve the right to change technical details of our articles which are serving for the further development of our articles and are reasonable for the customer.

Measurement tolerances

Because of the properties and characteristics of the components, minor measurement tolerances compared to the indication on the sketches are possible.

This concerns all shown measurements except the foundation measurements resp. measurements below upper edge ground level/play area.

2 Datasheet Super Climb Mini article 4641-3

1. Space requirement: 4,00 m x 4,00 m
Safety zone: 6,30 m x 6,30 m
Height of fall: 1.80 m
Equipment high: 2.40 m
Fallprotection area: 38 m²

2. Required safety surface:

Surface material	Description mm	Minimum thickness of layer mm	Maximum height of fall mm
Topsoil grass			<= 1000*
Chipped bark	20 – 80 grain size	300/400	<= 2000/3000
Wood chippings	5 – 30 grain size	300/400	<= 2000/3000
Sand	0.2 – 2 grain size	300/400	<= 2000/3000
Gravel	2 – 8 grain size	300/400	<= 2000/3000
Other ground materials	As recommended by manufacturer		

3. Name and overall dimension of the largest component:
Steel post 2,90m lang, Ø 60 mm
4. Name and weight of the heaviest component:
1x carton approx 25kg
5. Intended age group: 3 years and over
6. **Area to be excavated:**
1 x 0.80 m long x 0.80 m wide, total depth 0.70m including 10 cm drainage
4 x 0.60 m long x 0.60 m wide, total depth 0,90m including 10 cm drainage
Foundation-sized:
4x 0.60 m long x 0.60 m wide x 0,40m depth
Assembly time, once foundations complete: approx. 1 hour.
Required assistance: 1 person.
7. Any spare parts which may be required can be obtained directly from your supplier.
8. **We hereby confirm that this item of play equipment has been tested and certified in accordance with the play equipment standard EN 1176.**

Foundation edges must be rounded off

Sizes of foundations are designed for soils class "4-5" (natural ground).

Soil class 3: Non-cohesive to low-cohesive plasticity, sand, gravel and sand-gravel-mixtures, with very low portion of stones (portion > 30% with bigger dia-meter of 63 mm grain size)

Soil class 4: soft to medium plasticity, interleave bound, with minor portion of stone (portion < 30% with bigger diameter of 63 mm grain size)

Soil class 5: **Soil class 5:** ground with soil class 3 and 4 with big portion of stones (portion > 30% with bigger diameter of 63 mm grain size)

IN CASE OF SANDY AND SOFT SOILS, THE SURFACE DIMENSIONS OF FOUNDATIONS HAVE TO BE ENLARGED FOR ABOUT 50%!.

Assembly time, once foundations complete:

After completion of concrete foundations approx. 2 hours

Required assistance: 2-3 persons.

Required tools: wheel excavator or similar with a lifting height of approx. 4 m height ladder approx. 4 m long, spirit level, various wrenches and screwdriver.

Any spare parts which may be required can be obtained directly from your supplier or from Fa.Huck Seiltechnik GmbH

12. **Adress:** Huck Seiltechnik GmbH
Dillerberg 3
D-35614 Aßlar/Berghausen
Tel. +49 6443 8311-0
Fax +49 6443 8311-79

We hereby confirm that this item of play equipment has been tested and certified in accordance with the play equipment standard EN 1176.

3 Delivery contents (parts list with part numbers)

3.1 In words

Table 3-1: Delivery contents, in words

Pos.	Quantity	Element / Description	Size	O.K.	Missing
1	1	Steel post	Ø 60mm x 2.90m		
2	1	Network with pre-assembled PA cap			
3	5	Anchor plate 50cm x 50cm with ring nut			
100	8	Lamellar plugs	For pos. 103		
101	4	Threaded bolt	M8 x 45		
102	10	Sleeve nut	M8		
103	4	Turnbuckle	M12		
104	4	7s long link chain	Round about 1,10m long		
105	1	Shackle (for ground nails)	8er galvanised		
106	4	Ground nails	300 ml long plastic		
107	1	Loctite	3 ml		
108	4	Cross bar (to be provided by the customer)!	max Ø14mm		

3.2 In symbols

Table 3-2: Delivery contents, in symbols

Pos.	Stück- zahl	Symbol
1	1	 Steel post $\varnothing$ 60 mm - 2,90 m long
2	1	 Network with pre-assembled PA cap
3	1	 Anchor plate 50cm x 50cm with ring nut
100	8	 Lamellar plugs For pos. 103
101	1	 Threaded bolt M8 x 45
102	2	 Sleeve nut M8
103	4	 Turnbuckle M12 galvanized

Pos.	Stück- zahl	Symbol
104	4	 7s long link chain 1.10m long
105	4	 Shackle M8 galvanized
106	4	 300 mm Ground nails
107	1	 Loctite
108	4	 Cross bar (to be provided by the customer)!

1 - 6 !!	1. Clamp 2. Counter 3. Unscrew 4. Retension 5. Counter 6. Use lamellar plugs
ASK	After the unit has been set up and the chains are evenly tensioned on all sides, the remaining (too long) chain links at the top must be removed on site. Chain links at the top must be removed on site.
AB	The legally prescribed setting periods must be observed!
BgQ	Cross bar provided on site to fix the anchor chain
D	C25/30 concrete (for foundations) Q.ty required: 0,6 m³
DS	Stretch diagonally
E	Ground
F	Fall protection
PS	Minimum space including security area ~ 38,0 m²
Swvd	Fill up with ground in layers and compact!
O.K	Upper edge of playing level / + -0.00 mm
O.K.F	Upper edge of the foundation
G	Drainage layer
	Sizes of foundations are designed for soils class "4-5" (natural ground). Soil class 3: Non-cohesive to low-cohesive plasticity, sand, gravel and sand-gravel-mixtures, with very low portion of stones (portion > 30% with bigger diameter of 63 mm grain size) Soil class 4: soft to medium plasticity, interleave bound, with minor portion of stone (portion < 30% with bigger diameter of 63 mm grain size) Soil class 5: ground with soil class 3 and 4 with big portion of stones (portion > 30% with bigger diameter of 63 mm grain size) IN CASE OF SANDY AND SOFT SOILS, THE SURFACE DIMENSIONS OF FOUNDATIONS HAVE TO BE ENLARGED FOR ABOUT 50%!.

See drawings for details of shortcuts

Install instructions

Screw locking device!

glue all screws, nuts and sleeves with loctite.

(except for lock nut)

4 Post installation checks

If the equipment has not been installed safely, you must ensure that the public is prevented from using it.

4.1 Marking filler depth

- Labelling the posts to show the depth of material provided as fall protection (i.e. loose filler).

4.2 The equipment has not been installed safely in the following cases:

- Safe equipment installation is not complete.
- The protective surface has not been installed yet.
- Appropriate maintenance work cannot guarantee operational safety.

4.3 Removal of all assembly aids

- Please make sure that all assembly aids have been removed from the playing area. The equipment must not be approved for use until this check has been made.

4.4 Information about inspection of the equipment before it is used for the first time

- There are no special inspection requirements to be met before the equipment is used for the first time.

4.5 Retighten bolts

- After one week of play, please retighten all bolts again. Later upon respective maintenance.

5 Introduction Maintenance

5.1 General informations

This equipment should be installed, inspected, maintained and operated in accordance with EN 1176-7 guidelines.

Please note: Providing any necessary repairs are carried out, a piece of play equipment that is inspected regularly cannot become so damaged that it is dangerous.

Any spare parts which may be required can be obtained directly from your supplier.

This equipment should only be assembled, maintained and repaired by **persons with the necessary expertise**.

A copy of the inspection record should be given to the operator, who must confirm receipt.

**This maintenance instruction is based on the standard
“EN 1176-1:2017”.**

6 General maintenance information

6.1 Maintenance intervals

Maintenance intervals are based on average use. Please note that more frequent inspections and/or maintenance are required if the play equipment is subject to intensive use.

6.2 Inspection frequency

The frequency of inspections must be based on actual use. Factors that affect frequency include vandalism, location (e.g. coastal proximity), air pollution and the age of the equipment.

6.3 Maintenance products and procedures

All nuts and bolts are hot-dip galvanised or stainless steel. One of the characteristics of stainless steel is that uncontrolled cold welding may occur when the nuts are tightened. To prevent this, it is necessary to spray the nuts and bolts with Teflon spray or another similar lubricant.

6.4 Spare parts

All spare parts must conform to the manufacturer's specifications.

6.5 Identifying spare parts

All spare parts are listed in the parts list. The parts list follows the installation requirements.

6.6 Special instructions for the disposal of individual equipment components

No special instructions are necessary for the disposal of individual equipment components.

6.7 Special measures during the break-in period

No later than 2 weeks after assembly, all screwed connections should be checked and tightened if necessary.

6.8 Maintenance of protective surfaces

Surfaces providing fall protection must also be maintained regularly. It is particularly important to maintain the correct level of loose surface material and add more if necessary.

6.9 Faults

Faults must be repaired as soon as they are detected. If serious defects that compromise safety cannot be repaired straight away, the public must be prevented from using the equipment with immediate effect.

6.10 Loose screws

Loose screws always cause quality problems and put safety at risk. Therefore, loose screws should always be tightened and checks carried out to ensure that there are no missing screws (e.g. look out for holes you can see through).

6.11 Preventing equipment use

Use of the equipment should be prevented in the event of incomplete installation, disassembly, maintenance, repairs and faults.

6.12 Claims/liability for faults

Steel posts and footings are guaranteed if regular maintenance is carried out and recorded in writing. Our general terms and conditions apply. Maintenance first takes place after 3 years. The steel posts must be excavated as far as the concrete foundations and checked for corrosion.

Zinc paint should be applied to any corroded areas and scratches. Check ropes for abrasion. Retreat any that are very worn.

7 Maintenance timetable

7.1 Special advices

7.1.1 Maintenance interval

We strongly advise you to carry out inspections and maintenance work within the specified periods as use of the equipment, the weather and malicious vandalism cause wear and tear that compromises the safety and function of the equipment.

7.1.2 Maintenance intervals in the event of intensive use

Please note that more frequent inspections and/or maintenance are required if the play equipment is subject to intensive use.

7.1.3 Faults that compromise safety

Notice

In the event of a fault that compromises safety, quick action must be taken. This may involve repairing it immediately or shutting down and dismantling the equipment.

7.1.4 Faults that compromise function

Notice

Faults that compromise function should also be repaired immediately. Such faults lower the value of the equipment to the user and encourage malicious vandalism, which may render the equipment less safe. Any damage should also be repaired immediately.

8 Regular maintainan

Regular maintenance

9 Monthly maintenance

- 9.1 Check the spaces between the equipment and the ground (clearance and height of fall).**
- 9.2 Check the ground surface in the area with fall protection for hard objects and loose foundations.**
- 9.3 Check all connecting elements and fittings for wear and tear and tighten if necessary. Replace damaged or missing parts.**
- 9.4 Check that moving metal parts (joints, springs, etc.) move smoothly and are not worn. Replace if necessary. It is not necessary to lubricate joints as we only use maintenance-free metal roller bearings.**
- 9.5 Check all attachments such as chains, ropes, nets, etc. for damage and replace if necessary.**
- 9.6 Check rubber parts, sleeves, etc. for wear and tear or damage and replace if necessary.**
- 9.7 If necessary, remove excess padding material from the post footings due to danger of rotting.**
- 9.8 Check the surface of wooden parts for damage caused by the weather or external influences and mould. Repair or replace if necessary.**
- 9.9 Check the surface of plastic and metal parts, e.g. slides, for damage and replace if necessary.**

10 Quarterly maintenance

- 10.1 Detailed inspection of the operation and stability of the equipment paying particular attention to any wear and tear.**
- 10.2 Tighten all forms of attachment.**
- 10.3 Repaint and retreat surfaces.**
- 10.4 Maintenance of fall protection surfaces.**
- 10.5 Lubrication of joints.**
- 10.6 Check the height of the fall and top up with loose filler if necessary. If the posts are labelled, top up as far as the mark.**
- 10.7 Retighten all bolts**

11 Half yearly maintenance

- 11.1 Stability (check posts, bracing, foundations, etc.). Ascertaining whether there are any changes in equipment safety as a result of repairs that have been carried out or components that have been added or replaced.

 Attention	Annual Maintenance
--	-----------------------------

12 Annual maintenance

- 12.1 Ascertaining that the equipment, foundations and surfaces are safe for operation.
- 12.2 In particular, the equipment should be checked for decay and corrosion. It may be necessary to dig out or excavate certain components in order to do so. Zinc paint should be applied to corroded areas and scratches.

The equipment must be inspected by someone **with the necessary expertise** in strict compliance with the instructions issued by Huck Seiltechnik GmbH.

A copy of the inspection record should be given to the operator, who must confirm receipt.

13 Maintenance printout

Name of item: Super Climb Mini (registered design) / Art. No. 4641-3 _____

Location: _____

Customer or operator: _____
 (Town, Town council, Kindergarten)

Date of inspection	Inspector	O.K.	Accessible	Barriered	Defects	Repaired by	Date

Please copy and return once a year after main inspection has been carried out to the manufacturer by Telefax (06443) 83 11 79!
Place the confirmation form in the play equipment files.

14 Hand over document

After the installation of the equipment pass the installation and maintenance documents to the operator. The operator has to receive the hand over documents. The complete filled and signed hand over document should be sent to the supplier.
